Re: Erosion Control Product Acceptability Lists for Multi-Model Applications (PAL)

Synopsis of Changes for February 2004

1. CF 2000 from Construction Fabrics and Materials (CFM) is recertified for use as a Soil Stabilizer Type B
2. Stenlog 12 from Erosion Control Blanket.com is approved as a Temporary Ditch Check.
3. Western Excelsior XCEL SS-2 and XCEL SR-1 are removed from the approved list in Class I Type A and B.
4. Synthetic Industries (SI) CF7 and CF9 removed from Class II Type C. These Products are no longer manufactured.
5. An environmental designation has been added to mats that are to be considered for use in sensitive areas where a high probability of trapping wildlife in synthetic netting occurs. This language has been added to the Class I Type Urban mats and reinforced in the Class II C category.
6. Date of manufacture will be required on all Soil Stabilizer Type B products.

Sincerely,

Peter Kemp
Chair, ECSW PAL Committee
